THE RESIDENCE

Old-world stone, shaped for the way you live now.

Set beneath mature hardwoods in Lansdowne, 226 Wingrave Drive draws on the storybook architecture of the English and French countryside. Steep gables, a sweeping curved stone wall, copper lanterns and a deep arched entry give the home a presence that feels collected over generations.

Inside, the plan is open and generous without losing its sense of rooms. Ten-foot ceilings, cedar beams and a two-story foyer frame a main level built around the family room and kitchen, with the primary suite and a private guest suite on the same floor.

Five bedrooms, seven baths and 5,631 square feet, composed with the restraint of a much older house.
